

March on Washington Saturday, October 2nd

Because The Choice Is Very Clear!

**\$\$\$ Trillions \$\$\$
for Wars and
the Pentagon**

The Pentagon will spend more than \$700 billion this year alone on war and preparing for war. If we cut just 25% from the Pentagon budget we could solve a lot of the problems we face at home.

- Ending the Iraq & Afghanistan Wars, would save \$145 billion this year. (So far we've spent over a Trillion Dollars on these two wars and a tens of thousands U.S., Iraqi & Afghan lives have been lost!)
- Reducing active nuclear warheads would save an annual \$16 billion.
- Cutting the F-22 jet and other unneeded weapons systems - \$33 billion saved!
- Close half the 800 military bases outside the US. - Save another \$51 billion.
